AIT Manufacturing, LLC has recently acquired PAG Industries. For over thirty years PAG Industries has been the premier manufacturer of PVC Jacketing. AIT's primary goal is to be the number one supplier of PVC Jacketing in the North East. Our mission is to have the highest standards in Quality, Service and Value. These core beliefs coupled with our quality products will save you energy, time and money.

AIT manufactures 25/50 Smoke Safe PVC jacketing in .020 and .030 Mil thicknesses. Our standard length is 4' and we will make 3' lengths to order. We can supply jacketing for any pipe diameter both with and without double-sided tape (similar to 3M's 1163). No gluing necessary unless it is installed outdoors or in a wash down environment.

Our product is packaged in a plastic sleeve before it is packed in a cardboard case. This allows for quick inventory counts and order fulfillment. The sleeve also protects the PVC from damage and contaminants.

PVC Jacketing is used for covering all flat and round surfaces such as pipes, ductwork, tanks, and other mechanical equipment both indoors and out. Jacketing is rugged, high-impact, UV resistant (white only), and vapor resistant. PVC Cut and Curled Jacketing is used for commercial, institutional and industrial applications. It is ideal for use in the food, pharmaceutical; beverage; chemical processing and similar plants where cleanliness and appearance of insulated pipes are a maintenance concern.

2

AIT Manufacturing, LLC "K"- Saver® pipe jacketing:

- Available in 0.020 and 0.030 Mil thicknesses
- •Cut to 4' lengths standard (3' lengths available)
- •Curled to fit any pipe diameter
- Available both with and without double-sided tape (similar to 3M 1163)
- ■Sleeved in 5 or 10 piece packs
- ■Rugged, high impact & Vapor Resistant
- ■White jacketing is UV Resistant
- Provides a barrier to prevent bacteria, moisture and mold
- Easy to install
- Corrosion resistant
- Low maintenance
- Outdoor usability (white is recommended)
- Available in 14 different colors
- Easy to clean/wash down
- ■Temperature ranges from -35 degrees F to 500 degrees F
- ■25/50 Smoke Safe PVC Provides greater universal building code acceptance
- Attractive high gloss appearance
